Getting Started

OPENING AN ACCOUNT

Go to www.jdlab.com and sign up for a ROES account and start ordering today.

- OR -

Call our toll free number 888.858.8084 between 8:00 a.m. and 5:00 p.m. EST. Our staff will take a few minutes to collect your business information, assign you a customer ID, and answer any questions you may have.

WHICH ORDER ENTRY SOFTWARE IS RIGHT FOR YOU?

For the majority of wedding, portrait photographers and sports photographers we recommend using ROES order entry software. It is easy to get started and it is free. ROES will allow you to order your prints, add finishing services and use custom design aspects with the pager tool.

For photographers using ROES we also recommend ImageQuix to sell images on the Internet. This easy-to-use software allows you to sell images online, and even has an option to enable the orders to be sent directly to our lab for printing.

If you are a wedding photographer specializing in digital photo albums or multi-media sales presentations we recommend LabPrints. While the basic ordering module is free, the low cost Digital Studio LP© system is a comprehensive suite of marketing, ordering, album design, and presentation tools including the ability to put images or albums online for customers to order.

For high-volume underclass and sport photographers we recommend PhotoLynx. This software automates the production of the most popular products requested by schools and sports teams.

For more information about any of our order entry software go to www.jdlab.com.

IMAGE REQUIREMENTS

Our lab uses state of the art digital printers and Kodak Professional paper to create a 100% digital work flow. ALWAYS set your camera to capture the highest quality possible and the resulting files will produce a beautiful print in any size from minis up to 30X40.

We recommend NOT to re-size, crop or rotate your images before ordering. The order entry software will do this for you, and will ensure the highest quality image will be sent to us for printing. JD Deluxe customers should not color correct prior to sending, this is part of the Deluxe service you are choosing.

JPEG and TIFF: You need to decide what is the best for your studio needs. We can accept images in either of these formats, but level 10 or best quality JPEG is preferred. JPEGs are high quality files in a compressed format that makes them small enough to transfer quickly over the Internet. Large proof orders should be JPEG only. If you need to shoot TIFF or RAW, batch conversion tools are available to make JPEG copies for proofing.

Our goal is to help you create a simple work flow that moves quickly through your studio and our lab. You only need to shoot images and send them to us. Let us do the rest.

Choose from a matte or luster coating to protect your image. The gallery wraps are in ROES for easy ordering. The canvas material gives your photo a texture that is similar to a painting.
